

HY Audio Edit

A Powerful Audio Editing Model for Every Scenario

1 Speech Generation

Instruct TTS

Read the following text as a **warm, elderly storyteller, with a slightly raspy voice and a gentle, unhurried pace**:
"Long ago, beneath the southern lights, a little penguin learned that courage begins with one small step."

"Long ago, beneath the southern lights, a little..."

Zero-shot TTS

Ref Audio: 
Say the following with the same voice: "Welcome to the future of sound, where every idea can be heard, shaped, and shared..."

"Welcome to the future of sound, where every..."

2 Acoustic Editing

Speed Input

Faster 
Change the speed faster.

Slower 
Change the speed slower.

Volume Input

Louder 
Make the audio louder.

Softer 
Make the audio softer.

Pitch Input

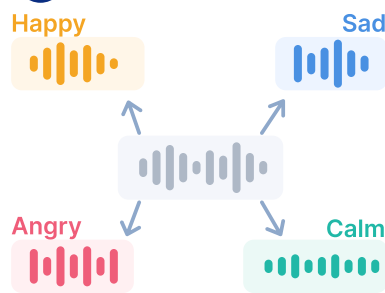

Higher 
Raise the pitch higher.

Lower 
Lower the pitch.

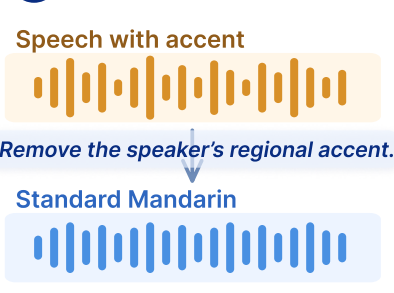

3 Paralinguistic Editing

Emotion

De-accent

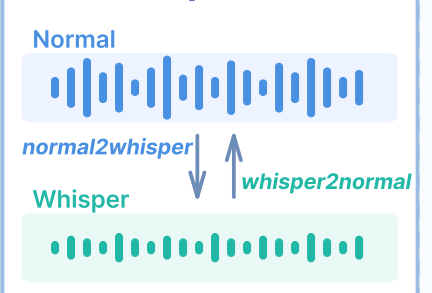

Nonverbal

Timbre

Whisper

4 Content Editing

Speech Content Editing

Input 
"The old intro starts after the greeting and plays softly."

Edited 
"The **old** intro starts **after** **before** the **warm** greeting and plays softly."

Music Lyric Editing

Input 
"We walk alone beneath the city lights tonight."

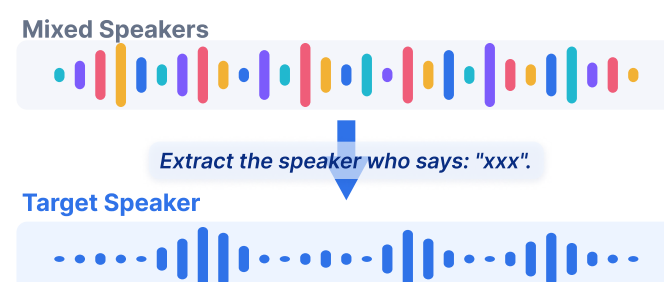

Edited 
"We **dance together** beneath the **neon** lights tonight."

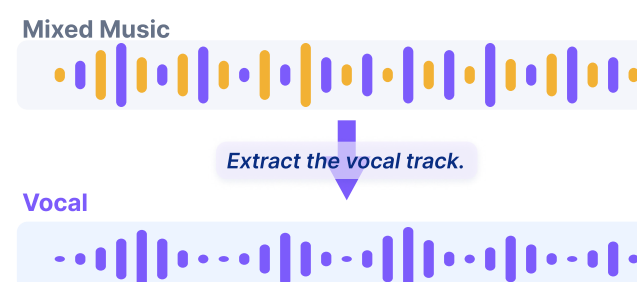

5 Enhancement and Separation
